Subject Index

Acute respiratory distress syndrome, shock toxin that produces disseminated intravascular coagulation and multiple organ failure, 322(4): 222–228

Adverse drug effects
- calculation of estimated creatinine clearance in avoiding drug dosing errors in the older patient, 322(3): 133–136
- captopril-induced jaundice, 322(4):236–240
- doxylamine overdose as potential cause of rhabdomyolysis, 322(1):48–49
- thrombotic thrombocytopenic purpura associated with clopidogrel administration, 322(3):170–172

African Americans
- Bogalusa Heart Study: long-term community study of rural biracial (black/white) population, 322(5): 293–300
- building a gateway to promote cardiovascular health research in African-American communities, 322(5): 276–281
- capacity building for research in minority health, 322(5):241–242
- capacity for research in minority health: need for infrastructure plus will, 322(5):243–247
- developing community capacity and improving health in African American communities, 322(5):269–275
- focus group data pertinent to prevention of obesity in, 322(5):286–289
- frequency of ophthalmic assessments among elderly whites and African Americans with eye disease and impact on visual function, 322(2): 71–74
- programs of the Robert Wood Johnson Foundation to develop minority medical careers, 322(5):290–292

Age effects. *See also* Older adults
- relationship between age and fever magnitude, 322(2):68–70
- risk factors for kidney stones in older women in Southern United States, 322(1):12–18

Alcohol abuse
- identifying and assisting the impaired physician, 322(1):31–36
- overweight/obesity, smoking, and heavy alcohol consumption as determinants of plasma PAI-1 levels in healthy men, 322(1):19–23

Aldosterone
- 11β-hydroxysteroid dehydrogenase and its role in the syndrome of apparent mineralocorticoid excess, 322(6): 308–315
- Liddle syndrome: genetics and mechanisms of Na^+ channel defects, 322(6):302–307

American Indians, Strong Heart Study: interaction with and benefit to American Indian communities, 322(5):282–285

Aneurysm, unusual coronary artery aneurysm and acute myocardial infarction in middle-aged man with systemic lupus erythematosus, 322(3):163–165

Angina, adult isolated hypoplasia of left pulmonary artery with exertional angina and abnormal exercise stress test, 322(2):113–118

Angiotensin-converting enzyme inhibitors
- antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221
- captopril-induced jaundice, 322(4):236–240
- small artery remodeling in hypertension, 322(1):7–11

Antifibrotic therapy, for treatment of pulmonary fibrosis, 322(4):213–221

Antihistamines, doxylamine overdose as potential cause of rhabdomyolysis, 322(1):48–49

Antimicrobial therapy
- long-term suppressive antimicrobial therapy for intravascular device-related infections, 322(4):209–212
- multiple antibiotic changes during first 72 hours of hospitalization, 322(2): 61–67

Antiplatelet agents, thrombotic thrombocytopenic purpura associated with clopidogrel administration, 322(3):170–172

Apparent mineralocorticoid excess syndrome, 11β-hydroxysteroid dehydrogenase and its role in, 322(6): 308–315

Arrhythmias, syncope and: role of electrophysiological study, 322(1): 37–43

Aspiration, foreign body aspiration diagnosed by microscopy, 322(1):44–47

Asthma, exercise-induced, 322(4):200–203

Ataxia, myoedema and normal pressure hydrocephalus, 322(2):119–120

Athletes
- exercise-induced asthma, 322(4):200–203
- the female athlete triad, 322(4):193–195
- sex hormones and knee ligament injuries in female athletes, 322(4):196–199

Autonomic neuropathy, spontaneous baroreflex sensitivity and heart rate variability are not superior to classic autonomic testing in older patients with type 2 diabetes, 322(1):24–30

Balloon pericardiotomy, diagnosis and management of chronic pericardial effusions, 322(2):79–87

Baroreflex testing, spontaneous baroreflex sensitivity and heart rate variability are not superior to classic autonomic testing in older patients with type 2 diabetes, 322(1):24–30

Bartter syndrome, inherited primary renal tubular hypokalemic alkalosis, 322(6):316–332

β-blockers, small artery remodeling in hypertension, 322(1):7–11

Blood pressure
- gene therapy for hypertension, 322(1): 1–6
- 11β-hydroxysteroid dehydrogenase and its role in the syndrome of apparent mineralocorticoid excess, 322(6): 308–315
- Liddle syndrome: genetics and mechanisms of Na^+ channel defects, 322(6):302–307
- monogenic mechanisms of blood pressure regulation, 322(6):301
- risk factors for kidney stones in older women in Southern United States, 322(1):12–18
- small artery remodeling in hypertension, 322(1):7–11

Bogalusa Heart Study, long-term community study of rural biracial (black/white) population, 322(5): 293–300

Bone and joint disease
- hypercalcemia in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112
- tall cell papillary thyroid carcinoma metastatic to femur, 322(2):103–108
- tuberculous arthritis mimicking neoplasm in hemodialysis patient, 322(6):373–375

Brain, myoedema and normal pressure hydrocephalus, 322(2):119–120

Breast cancer, α-fetoprotein-producing male breast cancer accompanied with hepatocellular carcinoma, 322(6):369–372

Bronchoscopy, foreign body aspiration diagnosed by microscopy, 322(1): 44–47

Bronchospasm, exercise-induced asthma, 322(4):200–203

Calcium channel blockers, small artery remodeling in hypertension, 322(1): 7–11

Calciuric response, to dietary salt of Dahl salt-sensitive and salt-resistant female rats, 322(6):333–338
Cancer
α-fetoprotein-producing male breast cancer accompanied with hepatocellular carcinoma, 322(6):369–372
hypercalcemia in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112
66-year-old man with hepatosplenomegaly and pancytopenia, 322(6):365–368
tall cell papillary thyroid carcinoma metastatic to femur, 322(2):103–108
Captopril, jaundice induced by, 322(4):236–240
Carboxyhemoglobin, in sickle-cell anemia: relationship to hemolytic and vasoocclusive severity, 322(6):345–348
Cardiology grand rounds
deep venous thrombosis, 322(6):358–364
diagnosis and management of chronic pericardial effusions, 322(2):79–87
pacing and hypertrophic cardiomyopathy, 322(3):156–159
prosthetic valve thrombosis and thrombolysis, 322(4):229–232
syncope and arrhythmias: role of electrophysiological study, 322(1):37–43
Cardiovascular health and disease
Bogalusa Heart Study: long-term community study of rural biracial (black/white) population, 322(5):293–300
building a gateway to promote cardiovascular health research in African-American communities, 322(5):276–281
capacity for research in minority health: need for infrastructure plus will, 322(5):243–247
deep venous thrombosis, 322(6):358–364
diagnosis and management of chronic pericardial effusions, 322(2):79–87
feasibility and reliability of rapid diagnosis of myocardial infarction, 322(6):339–344
implantable cardioverter-defibrillator endocarditis secondary to *Candida albicans*, 322(3):160–162
pacing and hypertrophic cardiomyopathy, 322(3):156–159
prosthetic valve thrombosis and thrombolysis, 322(4):229–232
small artery remodeling in hypertension, 322(1):7–11
spontaneous baroreflex sensitivity and heart rate variability are not superior to classic autonomic testing in older patients with type 2 diabetes, 322(1):24–30
Strong Heart Study: interaction with and benefit to American Indian communities, 322(5):282–285
syncope and arrhythmias: role of electrophysiological study, 322(1):37–43
unusual coronary artery aneurysm and acute myocardial infarction in middle-aged man with systemic lupus erythematosus, 322(3):163–165
Case Records of the VA Maryland Healthcare System/University of Maryland Medicine
78-year-old man with pancytopenia and abnormal lymphocytes, 322(3):151–155
66-year-old man with hepatosplenomegaly and pancytopenia, 322(6):365–368
Case studies in ethics, ethical issues of utility of resources, 322(3):145–150
Cholestasis, captopril-induced jaundice, 322(4):236–240
Cholesterol embolism
causing delayed healing of foot ulcer, 322(1):53–55
potential therapeutic effect of simvastatin on progressive renal failure and nephrotic-range proteinuria caused by renal cholesterol embolism, 322(1):50–52
Clinical trials, history of medical ethics and perspectives on disparities in minority recruitment and involvement in health research, 322(5):248–252
Clopidogrel, thrombotic thrombocytopenic purpura associated with, 322(3):170–172
Colchicine, antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221
Community-based research
Bogalusa Heart Study: long-term community study of rural biracial (black/white) population, 322(5):293–300
developing community capacity and improving health in African American communities, 322(5):269–275
ethical challenges in, 322(5):259–263
Strong Heart Study: interaction with and benefit to American Indian communities, 322(5):282–285
Consortium for Southeastern Hypertension Control
gene therapy to control hypertension, 322(1):1–6
small artery remodeling in hypertension, 322(1):7–11
Creatinine clearance, calculation of estimated creatinine clearance in avoiding drug dosing errors in the older patient, 322(3):133–136
Cytokines, hypercalcemia in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112

Depression, identifying and assisting the impaired physician, 322(1):31–36
Diabetes mellitus
mechanisms involved in tumor necrosis factor-α induction of insulin resistance and its reversal by thiazolidinedione(s), 322(2):75–78
pulmonary function in patients with, 322(3):127–132
spontaneous baroreflex sensitivity and heart rate variability are not superior to classic autonomic testing in older patients with type 2 diabetes, 322(1):24–30
tuberculous arthritis mimicking neoplasm in hemodialysis patient, 322(6):373–375
Diagnosis
deep venous thrombosis, 322(6):358–364
feasibility and reliability of rapid diagnosis of myocardial infarction, 322(6):339–344
and management of chronic pericardial effusions, 322(2):79–87
78-year-old man with pancytopenia and abnormal lymphocytes, 322(3):151–155
66-year-old man with hepatosplenomegaly and pancytopenia, 322(6):365–368
tuberculous arthritis mimicking neoplasm in hemodialysis patient, 322(6):373–375
Diet
calciuric response to dietary salt of Dahl salt-sensitive and salt-resistant female rats, 322(6):333–338
focus group data pertinent to prevention of obesity in African Americans, 322(5):286–289
risk factors for kidney stones in older women in Southern United States, 322(1):12–18
Digitoxin, uremic sera contain inhibitors that block digitoxin-valproic acid interaction, 322(4):204–208
Disseminated intravascular coagulation, shock toxin that produces multiple organ failure and, 322(4):222–228
DNA, mapping of the human genome: what does it mean for patients?, 322(4):175–178
Dosage calculations, calculation of estimated creatinine clearance in avoiding drug dosing errors in the older patient, 322(3):133–136
Doxylamine, overdose as potential cause of rhabdomyolysis, 322(1):48–49
Drug interactions, uremic sera contain inhibitors that block digitoxin-valproic acid interaction, 322(4):204–208

Eating disorders, the female athlete triad, 322(4):193–195
Electrophysiological study, role in syncope and arrhythmias, 322(1):37–43
End-of-life decisions, ethical issues of utility of resources, 322(3):145–150
Endocarditis, implantable cardioverter-defibrillator endocarditis secondary to *Candida albicans*, 322(3):160–162

Environmental factors, occupational inhalant exposure and respiratory disorders among never-smokers referred to hospital pulmonary function laboratory, 322(3):121–126
Epidemiology. *See also* Research

of utility of resources, 322(3):145–150

Factor V Leiden, clinical review, 322(2): 88–102
Fever, relationship between age and fever magnitude, 322(2):68–70
Foot ulcer, cholesterol embolism causing delayed healing of, 322(1):53–55
Foreign body aspiration, diagnosed by microscopy, 322(1):44–47
Fungemia, implantable cardioverter-defibrillator endocarditis secondary to *Candida albicans,* 322(3):160–162

Genetics
factor V Leiden: clinical review, 322(2): 88–102
gene therapy to control hypertension, 322(1):1–6
inherited primary renal tubular hypokalemic alkalosis: Gitelman and Bartter syndromes, 322(6):316–332
Liddle syndrome: genetics and mechanisms of Na^+ channel defects, 322(6):302–307
mapping of the human genome: what does it mean for patients?, 322(4): 175–178
Gitelman syndrome, inherited primary renal tubular hypokalemic alkalosis, 322(6):316–332
Glomerulopathies, prevalence in autopsies of patients infected with hepatitis C virus, 322(2):57–60

Headache, blepharoclonus, pseudoasterixis, and restless feet, 322(3):137–140
Healthy People Initiatives, research capacity and closing the health gap, 322(5):264–268
Heart rate, spontaneous baroreflex sensitivity and heart rate variability are not superior to classic autonomic testing in older patients with type 2 diabetes, 322(1):24–30
Hematology
carboxyhemoglobin levels in sickle-cell anemia: relationship to hemolytic and vasoocclusive severity, 322(6): 345–348
factor V Leiden: clinical review, 322(2): 88–102
shock toxin that produces disseminated intravascular coagulation and multiple organ failure, 322(4):222–228
Hemodialysis, tuberculous arthritis mimicking neoplasm in hemodialysis patient, 322(6):373–375
Hemodynamics, adult isolated hypoplasia of left pulmonary artery with exertional angina and abnormal exercise stress test, 322(2):113–118
Hepatitis C infection
interstitial pneumonitis in patient treated with α-interferon and ribavirin for, 322(4):233–235
prevalence of glomerulopathies in autopsies of patients with, 322(2): 57–60
Hepatocellular carcinoma, α-fetoprotein-producing male breast cancer accompanied with, 322(6):369–372
Hospitalization, multiple antibiotic changes during first 72 hours of, 322(2):61–67
Human Genome Project, mapping of the human genome: what does it mean for patients?, 322(4):175–178
Hydrocephalus, normal pressure, myoedema and, 322(2):119–120
11β-hydroxysteroid dehydrogenase, and its role in the syndrome of apparent mineralocorticoid excess, 322(6):308–315
Hypercalcemia, in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112
Hypertension
calciuric response to dietary salt of Dahl salt-sensitive and salt-resistant female rats, 322(6):333–338
gene therapy for, 322(1):1–6
11β-hydroxysteroid dehydrogenase and its role in the syndrome of apparent mineralocorticoid excess, 322(6): 308–315
Liddle syndrome: genetics and mechanisms of Na^+ channel defects, 322(6):302–307
risk factors for kidney stones in older women in Southern United States, 322(1):12–18
small artery remodeling in, 322(1):7–11
Hypertrophic cardiomyopathy, pacing and, 322(3):156–159
Hypokalemia, inherited primary renal tubular hypokalemic alkalosis: Gitelman and Bartter syndromes, 322(6):316–332
Hypoxemia, adult isolated hypoplasia of left pulmonary artery with exertional angina and abnormal exercise stress test, 322(2):113–118

Immunology
nonspecific human IgG reduces survival in neonatal rats infected with *Escherichia coli,* 322(3):141–144
78-year-old man with pancytopenia and abnormal lymphocytes, 322(3):151–155
66-year-old man with hepatosplenomegaly and pancytopenia, 322(6):365–368
Implantable cardioverter-defibrillator, endocarditis secondary to *Candida albicans,* 322(3):160–162
Infection
implantable cardioverter-defibrillator endocarditis secondary to *Candida albicans,* 322(3):160–162
interstitial pneumonitis in patient treated with α-interferon and ribavirin for hepatitis C infection, 322(4):233–235
long-term suppressive antimicrobial therapy for intravascular device-related infections, 322(4):209–212
multiple antibiotic changes during first 72 hours of hospitalization, 322(2): 61–67
nonspecific human IgG reduces survival in neonatal rats infected with *Escherichia coli,* 322(3):141–144
prevalence of glomerulopathies in autopsies of patients infected with hepatitis C virus, 322(2):57–60
relationship between age and fever magnitude, 322(2):68–70
Informed consent, ethical challenges in community-based research, 322(5): 259–263
Injuries, sex hormones and knee ligament injuries in female athletes, 322(4):196–199
Insulin, mechanisms involved in tumor necrosis factor-α induction of insulin resistance and its reversal by thiazolidinedione(s), 322(2):75–78
Interferon
antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221
interstitial pneumonitis in patient treated with α-interferon and ribavirin for hepatitis C infection, 322(4):233–235
Interleukin-6, hypercalcemia in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112
Interviewing, teaching doctor-patient interviewing skills using integrated learner and teacher-centered approach, 322(6):349–357
Intravascular device-related infection, long-term suppressive antimicrobial therapy for, 322(4):209–212
Involuntary movement disorders, blepharoclonus, pseudoasterixis, and restless feet, 322(3):137–140

Jackson Heart Study, capacity building for research in minority health, 322(5):241–242

Jaundice, captopril-induced, 322(4):236–240

Knee, sex hormones and knee ligament injuries in female athletes, 322(4):196–199

Lectin-affinity chromatography, α-fetoprotein-producing male breast cancer accompanied with hepatocellular carcinoma, 322(6):369–372
Leukemia
hypercalcemia in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112
66-year-old man with hepatosplenomegaly and pancytopenia, 322(6):365–368
Liddle syndrome, genetics and mechanisms of Na^+ channel defects, 322(6):302–307
Liver disease
captopril-induced jaundice, 322(4):236–240
α-fetoprotein-producing male breast cancer accompanied with hepatocellular carcinoma, 322(6):369–372
interstitial pneumonitis in patient treated with α-interferon and ribavirin for hepatitis C infection, 322(4):233–235
prevalence of glomerulopathies in autopsies of patients infected with hepatitis C virus, 322(2):57–60
66-year-old man with hepatosplenomegaly and pancytopenia, 322(6):365–368
Lymphoproliferative disorders
78-year-old man with pancytopenia and abnormal lymphocytes, 322(3):151–155
66-year-old man with hepatosplenomegaly and pancytopenia, 322(6):365–368

Medical education
programs of the Robert Wood Johnson Foundation to develop minority medical careers, 322(5):290–292
teaching doctor-patient interviewing skills using integrated learner and teacher-centered approach, 322(6):349–357
Medication errors, calculation of estimated creatinine clearance in avoiding drug dosing errors in the older patient, 322(3):133–136
Menstrual cycle
the female athlete triad, 322(4):193–195
sex hormones and knee ligament injuries in female athletes, 322(4):196–199
Mental health, identifying and assisting the impaired physician, 322(1):31–36
Metastatic disease, tall cell papillary thyroid carcinoma metastatic to femur, 322(2):103–108
Migraine, blepharoclonus, pseudoasterixis, and restless feet, 322(3):137–140
Minority health
Bogalusa Heart Study: long-term community study of rural biracial (black/white) population, 322(5):293–300
building a gateway to promote cardiovascular health research in African-American communities, 322(5):276–281
building capacity for health disparity research at minority institutions, 322(5):253–258
capacity building for research in minority health, 322(5):241–242
capacity for research in minority health: need for infrastructure plus will, 322(5):243–247
developing community capacity and improving health in African American communities, 322(5):269–275
frequency of ophthalmic assessments among elderly whites and African Americans with eye disease and impact on visual function, 322(2):71–74
history of medical ethics and perspectives on disparities in minority recruitment and involvement in health research, 322(5):248–252
programs of the Robert Wood Johnson Foundation to develop minority medical careers, 322(5):290–292
research capacity and closing the health gap, 322(5):264–268
Strong Heart Study: interaction with and benefit to American Indian communities, 322(5):282–285
Multiple organ failure, shock toxin that produces disseminated intravascular coagulation and, 322(4):222–228
Muscle
doxylamine overdose as potential cause of rhabdomyolysis, 322(1):48–49
myoedema and normal pressure hydrocephalus, 322(2):119–120
Mycophenolate mofetil, late recurrence of lupus nephritis in renal transplant recipient, 322(3):166–169
Myocardial infarction
feasibility and reliability of rapid diagnosis of, 322(6):339–344
unusual coronary artery aneurysm and acute myocardial infarction in middle-aged man with systemic lupus erythematosus, 322(3):163–165

National Institutes of Health
building capacity for health disparity research at minority institutions, 322(5):253–258
history of medical ethics and perspectives on disparities in minority recruitment and involvement in health research, 322(5):248–252
research capacity and closing the health gap, 322(5):264–268
Neonatal sepsis, nonspecific human IgG reduces survival in neonatal rats infected with *Escherichia coli,* 322(3):141–144
Nephrolithiasis, risk factors for kidney stones in older women in Southern United States, 322(1):12–18
Nephrotic syndrome, potential therapeutic effect of simvastatin on progressive renal failure and nephrotic-range proteinuria caused by renal cholesterol embolism, 322(1):50–52
Neurologic disorders, associated with chronic nitrous oxide abuse in nonhealthcare worker, 322(3):173–174
Niacin, antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221
Nitrous oxide, neurologic problems associated with chronic nitrous oxide abuse in non-healthcare worker, 322(3):173–174

Obesity/overweight
focus group data pertinent to prevention of obesity in African Americans, 322(5):286–289
and smoking and heavy alcohol consumption as determinants of plasma PAI-1 levels in healthy men, 322(1):19–23
Occupational health, occupational inhalant exposure and respiratory disorders among never-smokers referred to hospital pulmonary function laboratory, 322(3):121–126
Older adults
calculation of estimated creatinine clearance in avoiding drug dosing errors in, 322(3):133–136
frequency of ophthalmic assessments among elderly whites and African Americans with eye disease and impact on visual function, 322(2):71–74
relationship between age and fever magnitude, 322(2):68–70
risk factors for kidney stones in older women in Southern United States, 322(1):12–18
spontaneous baroreflex sensitivity and heart rate variability are not superior to classic autonomic testing in patients with type 2 diabetes, 322(1):24–30
Ophthalmology
blepharoclonus, pseudoasterixis, and restless feet, 322(3):137–140
frequency of ophthalmic assessments among elderly whites and African Americans with eye disease and impact on visual function, 322(2):71–74
Osteoporosis, the female athlete triad, 322(4):193–195

Pacing, and hypertrophic cardiomyopathy, 322(3):156–159
Pancytopenia
78-year-old man with abnormal lymphocytes and, 322(3):151–155

66-year-old man with hepatosplenomegaly and, 322(6):365–368
D-penicillamine, antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221
Pericardial effusions, chronic, diagnosis and management of, 322(2):79–87
Peripheral neuropathy, blepharoclonus, pseudoasterixis, and restless feet, 322(3):137–140
Physical activity
exercise-induced asthma, 322(4):200–203
the female athlete triad, 322(4):193–195
focus group data pertinent to prevention of obesity in African Americans, 322(5):286–289
sex hormones and knee ligament injuries in female athletes, 322(4):196–199
Physicians
identifying and assisting the impaired physician, 322(1):31–36
programs of the Robert Wood Johnson Foundation to develop minority medical careers, 322(5):290–292
teaching doctor-patient interviewing skills using integrated learner and teacher-centered approach, 322(6):349–357
Pirfenidone, antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221
Plasminogen activator inhibitor-1 (PAI-1), overweight/obesity, smoking, and heavy alcohol consumption as determinants of plasma PAI-1 levels in healthy men, 322(1):19–23
Pneumonia
foreign body aspiration diagnosed by microscopy, 322(1):44–47
relationship between age and fever magnitude, 322(2):68–70
Prevention
building a gateway to promote cardiovascular health research in African-American communities, 322(5):276–281
capacity for research in minority health: need for infrastructure plus will, 322(5):243–247
developing community capacity and improving health in African American communities, 322(5):269–275
focus group data pertinent to prevention of obesity in African Americans, 322(5):286–289
Proteinuria, potential therapeutic effect of simvastatin on progressive renal failure and nephrotic-range proteinuria caused by renal cholesterol embolism, 322(1):50–52
Pulmonary function and disease
adult isolated hypoplasia of left pulmonary artery with exertional angina and abnormal exercise stress test, 322(2):113–118
antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221
interstitial pneumonitis in patient treated with α-interferon and ribavirin for hepatitis C infection, 322(4):233–235
occupational inhalant exposure and respiratory disorders among never-smokers referred to hospital pulmonary function laboratory, 322(3):121–126
in patients with diabetes mellitus, 322(3):127–132

Racial factors. *See* Minority health

Sclerosing therapy, diagnosis and management of chronic pericardial effusions, 322(2):79–87
Shock, shock toxin that produces disseminated intravascular coagulation and multiple organ failure, 322(4):222–228
Sickle-cell anemia, carboxyhemoglobin levels in: relationship to hemolytic and vasoocclusive severity, 322(6):345–348
Simvastatin, potential therapeutic effect on progressive renal failure and nephrotic-range proteinuria caused by renal cholesterol embolism, 322(1):50–52
Smoking, overweight/obesity, smoking, and heavy alcohol consumption as determinants of plasma PAI-1 levels in healthy men, 322(1):19–23
Sodium
calciuric response to dietary salt of Dahl salt-sensitive and salt-resistant female rats, 322(6):333–338
Liddle syndrome: genetics and mechanisms of Na^+ channel defects, 322(6):302–307
Soluble interleukin-2 receptor, hypercalcemia in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112
Southern Society for Clinical Investigation
2001 Founders' Medal recipient's address, 322(4):182–183
2001 officers, 322(4):185–187

constitution, bylaws, and amendments, 322(4):188–192
highlights of 2001 meeting, 322(4):184
newly elected members—2001, 322(4):187
past recipients of Founders' Medal, 322(4):183
presentation of 2001 Founders' Medal to Dr. Donald M. Miller, 322(4):179–181
Presidential Symposium, 322(4):193–203

Southwestern Internal Medicine Conference, factor V Leiden: clinical review, 322(2):88–102

Strong Heart Study, interaction with and benefit to American Indian communities, 322(5):282–285

Substance abuse
identifying and assisting the impaired physician, 322(1):31–36
neurologic problems associated with chronic nitrous oxide abuse in non-healthcare worker, 322(3):173–174
overweight/obesity, smoking, and heavy alcohol consumption as determinants of plasma PAI-1 levels in healthy men, 322(1):19–23

Syncope, and arrhythmias: role of electrophysiological study, 322(1):37–43

Systemic lupus erythematosus
late recurrence of lupus nephritis in renal transplant recipient: response to mycophenolate mofetil, 322(3):166–169
unusual coronary artery aneurysm and acute myocardial infarction in middle-aged man with, 322(3):163–165

Tamponade, diagnosis and management of chronic pericardial effusions, 322(2):79–87

Taurine, antifibrotic therapy for treatment of pulmonary fibrosis, 322(4):213–221

Terminally ill patients, ethical issues of utility of resources, 322(3):145–150

Thromboembolic disease
deep venous thrombosis, 322(6):358–364
factor V Leiden: clinical review, 322(2):88–102
prosthetic valve thrombosis and thrombolysis, 322(4):229–232
shock toxin that produces disseminated intravascular coagulation and multiple organ failure, 322(4):222–228
thrombotic thrombocytopenic purpura associated with clopidogrel administration, 322(3):170–172

Thyroid carcinoma, tall cell papillary thyroid carcinoma metastatic to femur, 322(2):103–108

Transplantation, late recurrence of lupus nephritis in renal transplant recipient: response to mycophenolate mofetil, 322(3):166–169

Troglitazone, mechanisms involved in tumor necrosis factor-α induction of insulin resistance and its reversal by thiazolidinedione(s), 322(2):75–78

Tuberculous arthritis, mimicking neoplasm in hemodialysis patient, 322(6):373–375

Tumor necrosis factor-α
hypercalcemia in patient with B-cell acute lymphoblastic leukemia: role of proinflammatory cytokine, 322(2):109–112
mechanisms involved in tumor necrosis factor-α induction of insulin resistance and its reversal by thiazolidinedione(s), 322(2):75–78

Utilization of health care services
ethical issues of utility of resources, 322(3):145–150
frequency of ophthalmic assessments among elderly whites and African Americans with eye disease and impact on visual function, 322(2):71–74

Valproic acid, uremic sera contain inhibitors that block digitoxin-valproic acid interaction, 322(4):204–208

Vasculature. *See also* Cardiovascular health and disease
adult isolated hypoplasia of left pulmonary artery with exertional angina and abnormal exercise stress test, 322(2):113–118
shock toxin that produces disseminated intravascular coagulation and multiple organ failure, 322(4):222–228
small artery remodeling in hypertension, 322(1):7–11
unusual coronary artery aneurysm and acute myocardial infarction in middle-aged man with systemic lupus erythematosus, 322(3):163–165

Viral vectors, gene therapy to control hypertension, 322(1):1–6

Vision, frequency of ophthalmic assessments among elderly whites and African Americans with eye disease and impact on visual function, 322(2):71–74

Vitamin B_{12}, neurologic problems associated with chronic nitrous oxide abuse in non-healthcare worker, 322(3):173–174

Vitamin D, calciuric response to dietary salt of Dahl salt-sensitive and salt-resistant female rats, 322(6):333–338

Waldenstrom macroglobulinemia, 78-year-old man with pancytopenia and abnormal lymphocytes, 322(3):151–155

Women
the female athlete triad, 322(4):193–195
risk factors for kidney stones in older women in Southern United States, 322(1):12–18
sex hormones and knee ligament injuries in female athletes, 322(4):196–199

Wound healing, cholesterol embolism causing delayed healing of foot ulcer, 322(1):53–55
